Equally Well 

Look beyond the health history.

Support the person in front of you.

People with mental health and addiction issues have greater physical health vulnerabilities, that increase the risk of hospitalisation and death from flu.

Flu can make an existing condition such as asthma, emphysema, heart disease, or diabetes a lot worse.

Those with a serious mental health or addiction need, have a higher risk of getting very sick

It's free for people with mental health and addiction issues so please, make sure they know, make sure they're not overlooked.*
